

I just don't know what to say anymore. This week in Eretz Yisroel brought with it very strange and frightening happenings. There was a terrible and very ominous threat to the State of Israel by the Iranians who are getting top of the line missiles immediately from Russia. These missiles of course can carry atomic warheads and can make vast amounts of destruction. Besides that, we have had very

strange weather. Weather that seems to bring with it a feeling of destruction even though it wasn't really so cold outside and it wasn't pouring all the time. But when it rained the rain itself was so strong backed up by frightening thunder and lightning that it struck fear in most people's hearts.

Later on that day, a horrible tragedy stunned Israel. A group of boys and girls between the ages of seventeen and eighteen went on a hike even though they were warned that it could be dangerous because of the flash floods that occur in this kind of weather. These young people were considered the cream of Israeli society. They all came from so-called good families, made excellent grades in school and seemed to have bright futures in any profession they chose. Twenty-five young people went on a hike happy and carefree that ended in tragedy. A ferocious wind came along and torrential rains fell and dragged nine girls and one boy into the over flooded stream. All ten of them were killed in a very awful way and fifteen of their fellow hikers managed to go against the threat of nature and were unaffected and were saved. It was a day of Cheshbon Hanefesh for Am Yisroel. However, if we look at the whole world many more tragedies are happening with massive amounts of people being killed.

Hashem is speaking to us but we don't want to listen. Boruch Hashem, some people are listening and making a Cheshbon Hanefesh and coming to the right conclusion, but the vast majority of people want to continue ignoring the Truth. Am Yisroel must wake up! We are coming to the end of the world as we know it. What is about to happen is written in many of our Seforim. It is clear that now we are just before the Geula Sheleimah. Almost all of the signs have been revealed and now at this moment there is a bit of time to do real Teshuva. It is not enough to say you want to do Teshuva, you have to do Teshuva in order to save yourselves. The earth as we know it is not going to be anymore. If you want a place in eternity you have to change your ways. Even if a person is sure that he or she is a Tzaddik or Tzaddekes that person is obligated to make a search throughout himself into the deepest realms of his being and take out and

destroy his Yetzer Hora. He must admit to his Aveiros and do Teshuva for them. We don't have a lot of time. So many people in the world lately have died from natural disasters. The world is heading towards World War Three which will destroy a vast amount of the world and its population.

Most Yidden know this and know they have to do Teshuva. Hashem never strikes without warning but for the most part we are ignoring the signs. However, the closer we get to our destiny the more Yidden are realizing that things have changed drastically and hopefully all of the true Jews will do Teshuva.

I am very sad and all day long I feel like crying. I am crying because most of my Jewish brethren are ignoring Hashem's warnings. What else can I say? Am Yisroel you can choose right now whether you want to go the way of total destruction, Chas Vesholom, or the way of eternal life. There is no time! We have to make our choices because if we don't make our choices Hashem will make it for us.
