

I don't really know what to say or how to convince Am Yisroel that the end of the world as we know it is extremely close. Every Jew knows in the deepest places of his heart and soul that something terrible is waiting for us in the near future. I am sure that almost every true Jew knows in his heart of hearts, if he has strayed from the ways of Truth and has embraced the ideas and the way of life of the Goyim and even the so-called Frum Jews

know intuitively that many of them are also trying to imitate the ways of the Goyim especially when it comes to the Egel Hazahav.

Even a blind person today could feel that something is very wrong and very unusual. Any person that exists on this earth with even the most minimal knowledge of what is happening around us can figure out that the entire world is in terrible danger. We are getting signs and messages which are getting more extreme by the minute. These messages are obviously straight from Hakadosh Boruch Hu. All of the drastic weather-related disasters together with extremely dangerous upheavals like giant volcanoes exploding and putting hundreds of thousands of people in direct danger plus massive earthquakes all over the world. There have been unusual droughts, snow in the desert fearsome hurricanes one after another, and typhoons, and sinkholes which can swallow up whole buildings and many more happenings that I won't take up space to relate.

The "scientists" have lately made a new announcement that the ice caps situated at the north pole and the south pole are melting at an extremely fast rate especially in the past five years and this is filling up the oceans with an excess amount of water plus the fact that it is fresh water and not salt water which in itself is a very big negative influence on the nature that we are used to.

If this situation continues most of the worlds coastlines will disappear and with it the residence that live there. This was an official announcement that was given in many countries on the radio and or television or internet. It was publicized in a sporadic way all over the world so that people would know and would want more information, but since this was revealed there has been deadly silence on the subject. It was obviously a psychological trick to publicize this very dangerous situation but because of the absolute silence on the subject afterwards it made people feel that it is something that can be ignored like much of the news that we hear.

So Am Yisroel, you and I both know that the world is in a catastrophic Matzav-situation. We can't ignore it anymore. Hashem is speaking to us loud and clear and everyday every minute of the day these warnings become louder and clearer. Discard all your non-Jewish ways that you have adopted, search deep into your hearts and souls and find that direct connection to Hakadosh Boruch

Hu, The Hakol Yachol that every Jew possesses. Change your way of existence to a life of trying to fulfil all of Hakadosh Boruch Hu's rules and regulations that you must live by and learn Torah in order to make your connection with Hashem complete. Daven with all your heart and soul and throw away the excessive Gashmius that you have and want more of and come back totally to the Truth, Hakadosh Boruch Hu, The Hakol Yachol. Do it quickly! Time is running out! Learn what a Jewish home is really supposed to look like. Learn what a Jewish marriage is supposed to be like and know that every minute of the day 24/7 for the rest of your life you must live with only one goal, to please Hakadosh Boruch Hu. To serve Him with all your heart and soul and this is the secret to life itself, not the few years that we spend here on earth but this is the secret to eternal life. We human beings that have Jewish souls are kept alive forever by being connected totally to Hakadosh Boruch Hu. Once we have that connection, Be'ezras Hashem, He will forever nurture us in every way because in the end our souls get nourishment only from The Hakol Yachol. This keeps us alive, it keeps us healthy and content in every way and this only is the way to eternal life. This is life itself!

I believe that from the Seventeenth of Tamuz the world will rock and change in a most drastic way. I can't be a hundred percent sure of the date. However it is coming one way or another and it definitely will be enough to shake up most of the population of the world into a new and very frightening reality that they cannot deny anymore.
