

I have a very strong feeling which is a mixture of excitement and anxiety. I see on the horizon a massive amount of soldiers in combat uniform flanked by all kinds of armored weapons and tanks. From tanks to fighter planes the horizon is full of strange probably very technologically advanced weaponry. I feel the whole procession coming closer and closer. I feel that war is in the air. We may try

to ignore it but we know it is there. We know that every country of the world is preparing for a war. We are also confused by the fact that it is not so evident in every case who is against who and if one is against the other. We don't understand why but even if we don't understand and even if the soldiers themselves don't understand still they will be willing to give up their lives even for something that they don't quite understand.

In former years it wasn't so different except for the fact that the so-called leaders of the world could imbue their soldiers with a kind of loyalty and determination to sacrifice even their lives for whichever so-called sacred war they were part of. Today in our dark world there is almost nothing sacred and therefore I don't really understand why all those poor soldiers are willing to go into a world war, into a deadly world war so willingly. I can only think that the human race as a whole has basically lost any concept of one G-D, and therefore what they call religion is really Avodah Zorah which is the belief that the Satan is their god and this has taken over most of the religions of the world.

Yiddishkeit is the only exception! Our Torah is eternal! Hashem gave it to us, straight to Moshe Rabainu and he in turn helped to instill us with all its Truth. Hashem spoke to Moshe and Moshe spoke to Am Yisroel. However, there was one time that Hashem spoke directly to Am Yisroel as the mountain, Har Sinai, was lifted above their heads and they declared together Na'aseh Venishma, we will do and we will hear. Every one of those Jewish Neshomas - souls that said these words are the only ones in this world that can't be in any way part of the Avodah Zora that is so prevalent in our world today under different disguises but the same Avodah Zorah.

The real Jew could never attach himself to such a thing. There are Jews in our generation, even very respected Jews, who seem to believe in Hakadosh Boruch Hu and His Torah but really in their hearts yearn for the ways of the Goyim. However, the true Jewish soul will in the end reject totally anything that is contrary to Ratzon Hashem and therefore very few human beings will be left on this earth to move on to the next stage of Creation. I have been trying to make those that read what I am saying understand that whatever is written in the Torah has to be kept by every Jew and only when great Rabbis come together and make decisions about the true meaning of all kinds of things written in the Sifrei Kodesh that we don't understand so well, that they with their great

attachment to Shomayim are given the understanding and the ability to judge and to declare the meaning of what Hashem has asked from us and from that we have the Mishnayos, Gemorah, and all of our holy Seforim etc., and there are many thousands of them that explain to us how we are to live our lives. No people of the world, not the Greeks, not the Romans, not the Europeans, not the Americans etc. can compete in anyway with Jewish scholars with great souls who were sent to this world to help the Jewish nation, Am Yisroel, go in the right direction. Such a tiny nation with so much knowledge makes the people of the world jealous of us especially when, Chas Vesholom, we leave our connection with Hakadosh Boruch Hu, Chas Vesholom, and we search for our position in the non-Jewish world.

The whole world boasts of doctors, scientists, geniuses in technology etc. that are Jews although not practicing Jews and now we are coming to the end. We have to still be practicing Jews! If we in the end stubbornly reject our Judaism, Chas Vesholom, then it is a sign that the rejectors are not really Jewish Neshomas because at the very end when the Geula Sheleimah happens every Jewish soul will achieve its rightful place in Creation. All non-believers, Jew or gentile, Erev Rav or Edom etc. will disappear from existence.

I want you to understand, Am Yisroel, you have to keep Hashem's Torah. You have to do Hashem's will. You have to learn to want to be close to Him. You must learn to yearn to be His child and only then can you be sure that you are a real Jew and that your future will be Netzach. You can't have both worlds because one world is an illusion and Hakadosh Boruch Hu created that illusion to educate every Jew in what is Truth and what is Sheker. You can't have both worlds! In fact, there is only one real world and you are not going to get to the real world if most of your lives are built around a materialistic illusion. Therefore, we have to look like Jews, dress like Jews, speak and act with refinement. You have to fulfil all the Mitzvos and never do what is forbidden. If we fail in our efforts then we should feel so disappointed in ourselves that we went against the will of Our Father in Heaven and therefore we have to continuously do Teshuva. You can't have both worlds! We are coming to the end of the world as we know it. We can't act like Goyim anymore. We have to make our choice. Every true Jew will have the ability to do true Teshuva but he or she will have to do it no matter how difficult it might be for him or her. The world is about to change in every way. The physical world is in danger and most of it will be destroyed. Am Yisroel must make choices but really there are no choices because as I said many times before every true Jew will be saved because of his eternal holy Neshama that is destined to be part of the world to come.
