

I don't know what to say. I just know that we are entering very clearly a most difficult time for the whole world. There are all kinds of signs for this that even though it's very hard to deny them, it's very hard to deny the dangers of what is happening. Still the media of the world is trying very hard to confuse us with lies that are obvious, if a person wants to realize that they are being lied to. For example, strange

weather that the whole world is experiencing. Snow in the desert of Saudi Arabia, and tremendous ice storms in North America, unusually hot weather when it should be cold, snow in the summer in Australia, torrential rains in Europe and unusual cold, it goes on and on. Besides all of that we have in the last years seen millions of people being affected by earthquakes, some over the measurement of eight on the Richter scale which was at one point considered almost inconceivable.

There are also many people suffering from flocks of birds dropping from the skies, dead, and fish by the millions washing up on the shores, dead (small fish up to the large fish like whales, sharks, etc.) We see much lightening all over the world striking people, striking buildings ferociously and dangerously. Many of the animals that we know so well are becoming extinct and water levels of the oceans are rising. Our coastlines are becoming smaller. The north pole and the south pole are melting.

Our so-called leaders would have us believe that this is all because of the pollution, when in reality it can't be from the pollution because if it were from the pollution the ice and snow would be melting from the outside in. However, in reality it's melting from the inside of the earth outwards which means that for some reason the inside of the earth is heating up probably warming up the oceans and the rivers and the lakes, and maybe that is the cause of so many fish dying especially the smaller fish.

It is well known that for over one hundred years there were astronomers that knew that something was heating up all the planets in our solar system and now we see that it is probably Planet X, in the Zohar known as Hashavit and many other names. We know also that it is going to fly by and that this mini solar system Hashavit, Nibiru probably is making a very close fly by past our earth causing much damage and loss of life.

The media has been denying this fact and even though interestingly enough the Vatican, Yemach Shemam Vezichram, has become a partner with NASA in building a tremendously large and technologically advanced telescope on a mountain in the United States. Interestingly enough lately many famous people

like Prince Charles and Obama and the leader of the Russian Orthodox Church and many others have made visits to Antarctica which is known as the south pole. It is believed that their secret visits are because that from there with the correct instruments you can see this mini solar system clearly. There has been no reason given in any newspaper for these VIP visits, but in order to confuse the situation, in order to make people confused they, the Reshoim, have started a new campaign of flooding the media (internet, television, radio, etc.) with false information like stories about alien visits from outer space, asteroids that are about to hit the earth but don't in the end, and other imaginary happenings in order to confuse the endangered population of the world so that they can't pinpoint from where or why. The earth and its inhabitants will soon be in the greatest danger of total extinction, Chas Vesholom. The evil ones think that because they have built elaborate bunkers under the ground they will manage, Chas Vesholom, to escape the wrath of Hakadosh Boruch Hu, to escape the punishment that He is going to rain down upon them.

They are fools! He will destroy them with ease leaving nothing left to remember them by as individuals and as a group.

I am telling you all this so that you will realize that there is one G-D and He is Hakadosh Boruch Hu, the Hakol Yachol! He created this earth and everything on it and only He can destroy it if He wants. No human being or any of the forces that exists have any independent abilities. He rules all. He created all. He is the Hakol Yachol! He created the Jewish Neshoma to live forever. He created the Jewish Neshoma from inside Himself to be part of Creation forever. No force of evil could ever make any kind of impact in any way on His existence and anyone who tries is doomed! He gave us the Torah and everything that goes along with the Torah, all the commentaries everything that was born out of the Torah. He gave us Tzaddikim that have knowledge to explain to Am Yisroel what exactly is the meaning of the Torah. He gave us the ability through our Rabbonim, who are Talmidei Chachomim to understand how Hashem wants us to live our lives and if we don't, Chas Vesholom, go according to His Torah completely we have no future or we will get a very unpleasant punishment.

Hashem is Love. However, He guides us sometimes in a strict way because He knows the heart of every human being and He knows how to direct us. He is our Father and He knows exactly what we need sometimes with a loving hand and sometimes with a Potch. But it is all from love of His chosen ones.

Am Yisroel there will be a war now very soon, a terrible war, Hashem Yishmor. Before the war actually happens or together with the war there will be a tremendous financial drop all over the world. These things will throw the world into total chaos. After that I believe this mini solar system will make its undeniable appearance and the people of the earth that have been evil like the Erev Rav, the Edomim, the Yishmaelim, the Amalaikim will pay the price of being

totally disloyal to their Creator. The Jews that are truly Jews will be forced to do Teshuva. And not one real Jewish Neshoma will be lost! However, there will be much suffering together with many enormous Nissim to save us from ourselves and from the Yetzer Hora.

I want to close by saying this, whether you accept what I am saying or not, I am sure you feel the great dangers that are lurking everywhere here on planet earth and I beg Am Yisroel get rid of the Egel Hazahav.

Women with tight clothes and make-up and Sheitels and sheer stockings, when they walk in the street catch the eyes of men. These women can't really believe that they can walk into the Bais Hamikdosh dressed like that! Every Jewish Neshoma knows that there is no salvation for Chutzpah. A woman that would even dream of entering the Bais Hamikdosh the Makom of the most Kedusha dressed like a street urchin is guilty the most outlandish Chutzpah, impudence, gall. Let me remind also the men who allow their wives to do this to remember that just as the first man was held responsible for his wife's actions and his own, so too will be all of the "Tzaddikim" that allow their wives to dress and act in opposition to the most basic principles and laws of the Torah. This covers not only Tznius but many other things. It covers the whole Aseres Hadibros and the Torah in its entirety.

I beg Am Yisroel don't cause yourselves undue suffering for such stupidity. Stop all the influences of the Goyisha world like television, internet, the media etc. Stop waking up in the morning thinking about frivolous things and instead put your minds on thanking Hakadosh Boruch Hu, begging Him to make you and your family true Erlicha Yidden which will bring you Netzach.
